JR's POS Depot Partners with ExaDigm for Wireless Point-of-Sale Terminals *Leading U.S. Distributor Recognizes the XD2000 as the Industry-Leading Wireless POS Terminal*

SANTA ANA, CA and SUNRISE, FL – April 11, 2006, ExaDigm, Inc., the leading innovator of wireless and wired point-of-sale (POS) terminal solutions, and JR's POS Depot, one of the payment industry's largest independent distributors, today announced the formation of a Strategic Partnership between the two companies. This new partnership will see JR's POS Depot offering the XD2000 Cellular Wireless Solution as the wireless point-of-sale solution of choice to their key channels, specifically the merchant acquiring industry.

Through this partnership, JR's POS Depot will now have the ability to offer the most comprehensive wireless POS solution available on the market today. The XD2000 Cellular Wireless Solution features a fully modular design and PC-based Linux operating system giving users the ability to change wireless connectivity between CDMA/1XRTT and GSM/GPRS with the simple swap of a modem. In addition, with full VISA CISP validation and 256-bit SSL encryption at the time of card swipe, the XD2000 Cellular Wireless Solution offers the highest level of security available with any POS terminal on the market today.

"The market lacks good wireless solutions, despite the increasing need and demand for them over the last year. Most manufacturers have been slow to develop good products that meet these needs," stated Riad Alakkam, Executive Vice President of Sales and Marketing for JR's POS Depot. After careful evaluation, we have found that ExaDigm has great products and solutions that we can finally offer the POS wireless market. We feel that our partnership with ExaDigm will benefit both companies as well as our customers."

"As one of the industry's largest and most respected independent distributors, JR's decision to offer the XD2000 Cellular Wireless Solution as their wireless POS solution of choice speaks volumes to our commitment to leading the industry in this area," said Michael Mulcahy, President and COO of ExaDigm. "Our partnership with JR's POS Depot represents a great milestone for ExaDigm and the start of a business relationship which will see both companies benefit greatly."

JR's POS Depot has made the XD2000 Cellular Wireless Solution available to its customers immediately and is able to ship and fully support units today.

About ExaDigm, Inc.

ExaDigm is the leading innovator of IP wireless, wired and modular point-of-sale (POS) terminal solutions.
