Equity Commerce Selects ExaDigm's XD2000 as Mobile POS Terminal of Choice

Leading Payment Processor Sees XD2000 as Key to Entering New Markets

SANTA ANA, CA – December 4, 2007 – ExaDigm, Inc., the leading innovator of wired and wireless point-of-sale (POS) terminal solutions, today announced that payment processor, Equity Commerce, L.P., has selected the XD2000 Mobile Payment Solution as its mobile wireless point-of-sale terminal of choice.

Equity Commerce chose the XD2000 because, unlike any other wireless terminal on the market today, it delivers a truly future proof solution for wireless payments with a return on investment unparalleled in the industry. Through its modular design ensuring terminal hardware is easily upgradeable avoiding redundancy due to changes in technology; the ability to change wireless connectivity between GDMA, GSM and WiFi with a simple swap of a modem; the fact the PC-based operating system allows for application updates in hours not months; and advanced security features offering maximum protection to merchants and cardholders alike; the XD2000 provides Equity Commerce with a very real competitive advantage in the industry.

"We are excited about the opportunities that our partnership with ExaDigm creates for our company as well as for our agents and customers," commented Jerry M. Julien, EVP of Business Development for Equity Commerce. "ExaDigm is an industry leader in the mobile POS terminal marketplace and a perfect fit for our organization."

The XD2000 has enabled Equity Commerce to expand into a range of new markets where card-based payment acceptance was traditionally not an option.

"We are certainly excited that an industry leader such as Equity Commerce has chosen to offer the XD2000 as its wireless terminal of choice," said Michael Mulcahy, CEO of ExaDigm. "In our ongoing efforts to ensure we deliver the industry's most innovative and cost-effective terminal products we are pleased to be able to provide a solution that supports Equity Commerce's growth plans."

Equity Commerce has made the XD2000 Cellular Wireless Solution available to its customers immediately and is able to ship and fully support units today.
