Amtrak Selects ExaDigm's XD2500 for Automation of Credit Card Acceptance for Onboard Ticket Sales

*The Nation's Passenger Railroad Set to Offer Real-Time Onboard Credit Card Acceptance for Ticket Sales
with the Deployment of the XD2500 Mobile Wireless Solution*

SANTA ANA, CA – May 18, 2009 – ExaDigm, Inc., the leading innovator of wired, wireless and integrated payment solutions, today announced that it has been selected by Amtrak to provide mobile wireless payment terminals enabling onboard acceptance, and real-time processing of, card-based payments for ticket sales.

ExaDigm's XD2500 Mobile Wireless Payment Terminal will be deployed nationwide for use by 1,600+ conductors and assistant conductors on all passenger routes. Amtrak's deployment of the XD2500 for onboard ticket sales is centered on an initiative which will result in the implementation of a faster, easier payment process for customers; reduction of credit card losses; full PCI-DSS compliance in the onboard sales environment; and a reduction in the risk of credit card fraud.

"The decision by Amtrak to award ExaDigm this multi-million dollar contract once again validates our position as a leading provider of secure, mobile wireless point-of-sale technology," said Jack McDonnell, Chief Executive Officer for ExaDigm. "We are delighted to be expanding our relationship with Amtrak and partnering with them yet again to bring mobile card-based payment acceptance to their customers."

The latest terminal in ExaDigm's family of 2000 Series Mobile Payment Solutions, the XD2500 features the choice of CDMA or GPRS wireless connectivity; an unparalleled level of security including full PA-DSS and PCI-PED compliance; and a PC-based architecture with Linux operating system ensuring rapid and cost-effective application changes, updates and customization. This mobile handheld terminal is not only intuitive and easy to use, its form factor is one that is ideally suited for use in an onboard environment.

Amtrak will commence a nationwide rollout of the XD2500 this summer. It is anticipated that a full deployment will be completed early next year.

About ExaDigm, Inc.

ExaDigm is the leading innovator of modular IP-based wired, wireless and integrated payment solutions. Through a detailed understanding of the technology, wireless and payment industries, as well as through extensive relationships with financial institutions, ISOs, and transaction processors, ExaDigm provides innovative technology-focused solutions enabling businesses worldwide to expand revenues, reduce costs and boost productivity. Founded in 2000, ExaDigm is headquartered in Santa Ana, California, with operations around the globe. For more information, visit www.exadigm.com.

About Amtrak

Amtrak has posted six consecutive years of growth in ridership and revenue, carrying more than 28.7 million passengers in the last fiscal year. Amtrak provides intercity passenger rail service to more than 500 destinations in 46 states on a 21,000-mile route system. For schedules, fares and information, passengers may call 800-USA-RAIL or visit Amtrak.com.
